

Engineering Technician

Attractive Salary and Benefits

About the Job

We also have exciting opportunities for technicians to join our Technical Engineering Team.

Ideal applicants will have gained sound and practical electro-mechanical experience in a systems engineering environment. The role will offer greater exposure to manufacturing systems, design, test and trials as well as working closely with our other specialist Departments.

Applicants should be good problems solvers and have the ability to quickly learn and master new concepts. They should be articulate, with good communication skills as well as possess an ambition to develop within the role.

This is a great development opportunity as we are looking for applicants hungry to consolidate and further their future engineering career.

We are also happy to offer work placements to those individuals currently serving in the military. Our desire is to provide valuable experience that will assist with the transition to full-time civilian employment. There would be opportunities to apply for full-time positions after the placement has finished.

Company Description

What we do

Hansford Sensors manufactures and supplies vibration measurement equipment to over 44 countries worldwide. Our equipment enables measurable improvements in the performance and efficiency of industrial plant by providing vibration diagnostics that support predictive and preventative maintenance on key equipment such as fans, pumps, motors and gearboxes. Our products include intrinsically safe accelerometers approved for use in Group I (Mining) and Group II (Petrochemical). We also supply multi-sensor switch boxes, vibration sensor modules, portable vibration meters, accessories for sensors, vibration condition monitoring protection systems and custom built vibration sensors.

If you are interested in this position, please apply by sending your cv and covering letter to HR@hansfordsensors.com
